# **Invitation for Bids (IFB)**

**Islamic Republic of Afghanistan**

## **Gravity Fed Water Supply Scheme In **Sadat e Kalo Village of Shibar district of Bamyan Province,** **Afghanistan** **Under Water and Sanitation Extension Program (WASEP)****

Under Water and Sanitation Extension Program (WASEP) the Aga Khan Agency for Habitat (AKAH), Afghanistan would construct a new water schemes to bring potable water to the communities and grey water drainage through household taps in **Sadat e Kalo Village of Shiabr district of Bamyan**. The taps must function 365 days / year, in all weather conditions and the water quality, at all times, and must meet WHO standards for drinking water, as specified in the specification.

The Expected works under this assignment shall involve the followings for the Water Supply Networks in **Sadat e Kalo** villages:

1. Water Supply Scheme with water distribution mains, branches, laterals, lines and service connections to include all pipe, valves, fittings and appurtenances, and pipe thrust restraint. The total schemes should be 1.2 m under the ground with complete pipe fittings (Straight Coupling, GI union, reducing tee, Clump Saddle and etc.), all according to the specification, BoQ and design drawings or site-based requirements.
2. Break Pressure with the complete set of pipe fitting (GI Union, Female adopters and etc.), all according to the specification, BoQ and design drawings or site-based requirements.
3. Stand Tap construction with complete set of pipe fitting (Brass Bib Cock, GI Nipple, Elbow, socket, Teflon tape, Female adapter and etc.), all according to the specification, BoQ and design drawings or site-based requirements.
4. The contractor, together with the AKAH Field Engineer will test the water at the source, reservoir and a distribution once the project construction is completed. Any measure required to ensure that the water is distributed to each household at the WHO standard will be the responsibility of the contractor. The water quality must continue to meet WHO standards for a minimum of 1 year following completion of the project.
5. Contractor must provide training of the operations and maintenance of the system to the village water user committees and deliver user manuals in Dari and the toolkit.
6. The contractor should strictly follow all safety measure regarding COVID-19

according to the guidance of Ministry of Public Health (MoPH) of Afghanistan.

The duration of the project is expected to be up to 03 months (01 September to 30 November 2020) right from the issue of Notice to Proceed (NTP/LOI) 27 August 2020. The cost must be provided for both the project based on the BoQ shared by AKAH. If any element is missing, that should be recorded and costed in separate sheet.
