

## Request For Proposal

**No:** (BOR-AFG,RFP#002-2020)

**DATE:** 10/08/2020

**TO:** Qualified Consultancy Companies

**FROM:** Bremen Overseas Research and Development Association (BORDA)

**SUBJECT:** Development of a two days training package on Activated Sludge Wastewater Treatment Systems and conducting of the training

### BACKGROUND INFORMATION

The Bremen Overseas Research and Development Association (BORDA) was founded in 1977 by planners, engineers, business people, and social scientists as a civil society expert organization. Collaborating worldwide with more than a hundred organizations, we are committed to making the transition towards liveable and inclusive cities which gives disadvantaged urban populations access to essential public services such as energy, sanitation, waste management, and water. We are active in 25 countries in Latin America, Central, and West Asia, South and South-East Asia, and Africa. We support holistic approaches to policy formulation, participative urban planning processes and infrastructure development. In this respect, we design and implement innovative system packages together with our partners, foster capacity development at the local, national and international level, and facilitate dialogue between civil society organizations, communities, government entities, the private sector, scientific institutions, and international organizations.

The objective of this assignment is to develop a two days training package on Activated Sludge Wastewater Treatment Systems and to conduct the training for the relevant government engineers.

### SCOPE OF WORK

The scope of work shall include;

- To prepare the training materials for the 2 days training on Activated Sludge Wastewater Treatment Systems based on the agenda attached.
- To deliver the training program to engineers from the relevant government organizations.
