Addendum No. 01

Digitalization of Capacity Needs Assessment Tool (CNAT) for IDLG CIDD
Effective Date of Addendum: **September 28, 2020**

Addendum No: 01

The purpose of this addendum is:

- To provide answers to the questions received up to date.

Questions and Responses:

Question 1:

1. Is it possible to share the existing MS. Excel-based Capacity Needs Assessment template?
2. What is your preferred Coding language and Database technology to be use in this project?
3. What should be the user page (Front End) language (Dari, Pashto or English)

Response:

Answer# 1: The MS. Excel-based tool is an internal document and cannot be shared, at this stage. The sheet mainly entails sums, percentage, average and comparative calculations.

Answer# 2: Any programming language and database technology keeping the scalability and stability in mind to allow the CNAT system to be scaled and connected with other training media including libraries and PDF documents.

Answer# 3: Dari will be the front page, but Pashto and English should be also available if a user prefers to switch the languages.
